

Assessment-qa-devops

Find the three known bugs

1. The win counter doesn't work
2. The get all robots button sends an error to the console
3. The your duo disappears when you remove someone from the duo. But it stays there if you don't start picking the robots.

Test case: can you pick all of the robots available?

Can you pick every single robot in any combination?

Steps:

1. Click draw
2. Make sure there are 5 robots
3. Add the first two robots from the list
4. Remove the second robot from the list
5. Add the third one in place for the second one
6. Treat it like a double for loop until you are done
7. ":tada: test case complete"

Expected result: is that all of the robots can be picked in any combination.

Bug report:

Description: The get all robots button doesn't work and sends an error

Steps to reproduce:

1. Click on the see all bots button

Expected result: see all the bots

Actual result: no bots available and errors in the console

Environment sections:

Operating system: Windows 11

Test case 2: can you add more than two bots?

Can you pick 3 or 4 or 5 robots for your duo

Steps:

1. Add one bot
2. Add the second bot
3. Add the third bot

Expected result: when you go to add the third robot there should be an alert that says You can only choose two bots!
